

28 April 1975

MEMORANDUM FOR: All NIOs
SUBJECT : KIQ Charts

1. Attached is the matrix/chart on "level of collection effort" with respect to the KIQs which we have discussed. (Also appended is [REDACTED] buckslip to the DCI on this topic.)

25X1A9a

2. On these forms, the DCI does not want numbers but he would like the blocks filled in with the color code indicated.

a. Red is used where a special effort has been/is being mounted by a given Community collection component or system.

b. Blue is used for systems or components which in the course of their normal business collect against a given KIQ but which are not mounting an extraordinary effort with respect to that particular KIQ.

c. Yellow is confusingly labeled on the form with the phrase "as encountered." What this means is that the collection system or component in question would not normally develop information with respect to the given KIQ but may do so if a chance circumstance arises or if it should happen to pick up information bearing on that KIQ in the course of its other (normal) efforts.

d. White is used for a collection system or component which does not target against a given KIQ and would not reasonably be expected to do so.

3. We can discuss this topic further, but the DCI is quite anxious to have these matrices developed with respect to each of the FY 1975 KIQs (in light of the collection tasking outlined and accepted in the strategy papers). He will doubtless raise this matter at our 29 April session and I would like to be able to assure him truthfully that work on these forms is proceeding with all possible dispatch. FOIAb3b

George A. Carver, Jr.
